To Identify Associations with Rare Variants, Just WHaIT: Weighted Haplotype and Imputation-Based Tests
Yun Li,* Andrea E. Byrnes, and Mingyao Li

(The American Journal of Human Genetics 87, 728–735; November 12, 2010)
On page 729, the third formula on the left panel should be:

\[ S_h = \frac{1}{\sqrt{N_h \cdot f_{z,h} \cdot (1 - f_{z,h})}}. \]

The formula on the right panel should be:

\[ WDS_l = \sum_{j=1}^{M} I(j \in M) \cdot (-1)^{j-1} \cdot W_j \cdot D_{ij}, \]

The authors apologize for the errors.
